This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional):

Botium Toys should create stronger passwords and use a password manager, make a backup plan in case something goes wrong, start using encryption to protect customer data, limit access to only those who need it, set up systems to catch threats early, keep older systems checked and updated, follow rules like PCI DSS and GDPR by protecting data and privacy, and use trusted security practices to keep information safe and under control.
